ERHARDT TERRACE ROOF T100/T150

INNOVATIVE, HIGH-QUALITY AND FLEXIBLE

Whether in spring, summer or autumn, an ERHARDT terrace roof allows you to enjoy the open air, protected from wind and weather. The combination of perfect protection from wind and rain, ultimate comfort and almost unlimited design flexibility makes an ERHARDT terrace roof the ideal addition to your home – and with our many years of experience manufacturing terrace roofs we guarantee nothing but the highest quality and state-of-the-art technology.

ERHARDT TERRACE ROOF T100/T150

ONE PRODUCT – MANY OPTIONS

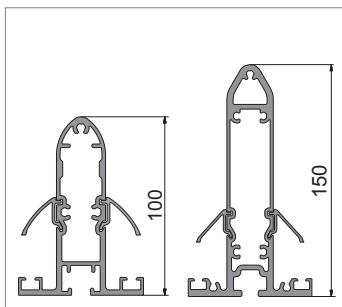

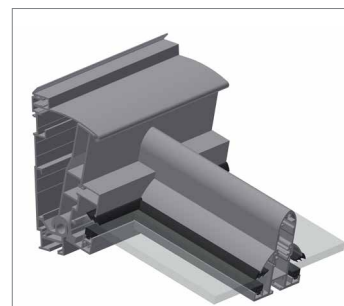

Design

ERHARDT terrace roofs are extremely robust aluminium structures, with a clever cross section design of the load-bearing elements which means that very few obtrusive supports are required for large glass surfaces. The attractive design gives the terrace roof a sleek, lightweight look while making it extremely sturdy and long-lasting.

New, multi-piece wall connector technology

The new, multi-piece wall connector offers maximum versatility and forms the perfect seal. The wall connector has a cascading design with three layers of concealed drainage to prevent water ingress. An intelligent design, including grooves for LED lighting and attaching supports, makes mounting easy and gives you full flexibility.

Two different rafters

Two different rafter heights are available depending on the circumstances and static requirements. As standard, both rafters come with channels for fitting lighting and discreetly attaching awnings.

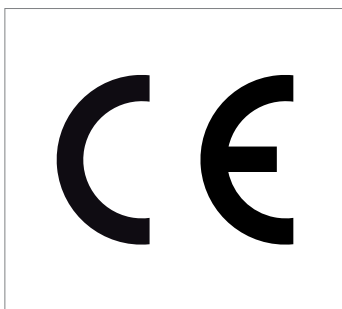

Can be expanded at any time

ERHARDT terrace roofs can be supplemented by glass and sliding elements in any number of ways at any time. The range includes fixed glass elements and screening elements made from glass and aluminium which ensure ideal wind and weather protection.

Additional features

An additional LED lighting pack and heating element from ERHARDT, available with manual or remote control, allow you to create the comfort and ambience that's right for you in your conservatory.

**CE Made in Germany**

All ERHARDT Markisenbau products are made in Burtenbach, Bavaria. All-round service and continuous production control guarantee high quality.

Professional shading for perfect comfort

We offer every kind of professional shading solution, from over or under-roof mounting with high-quality and durable cassette awnings to sophisticated vertical awnings offering protection against the low sun and curious glances. Our versatile fabric collections give you a wide range of awning fabrics to choose from which can be customised to meet your wishes and requirements.
