Ordering & Dimensions

Glidermatic doors require an extra 20mm side clearance on the side the drive unit is required to be fitted.

Sizes - GlideRol•a•Door up to 5m wide and 3m high.
GlideRol•a•Door Mini up to 3.4m wide and 2.1m high.

Windlock system - should be specified for double doors in very exposed locations and greater side room clearance is required. For advice and information, speak to our technical department or your supplier.

DIMENSION PANEL (minimum sizes) mm							
SERIES A (Hand Operated)	Side Room		Head Room	A	B	C	D
	Resid.A	Resid.AA					
2100 HIGH	90	125	430	25-100	500	150	280
2400 HIGH	90	125	450	25-100	540	160	290

These lead times are a guide only and can fluctuate during peak order periods, please seek confirmation.

Ordering & Dimensions

ORDER BY OVERGUIDE WIDTH AND GUIDE HEIGHT (on official order form). All Gliderol Roll-A-Glide doors are supplied with remote control operation with two handsets, a bottom rail safety edge, internal manual release and alarm buzzer as standard.

Doors over 9m² (see above price matrix) are supplied as standard with a safety break device.

All Roll A Glide doors are ordered using the guide height (GH) and the over guide width (OGW). The OGW is the opening width plus 180mm / 140mm (width of the guides = 2 x 90mm / 70mm).

FITTING BETWEEN THE OPENING

If fitting between the opening the over guide width of the door should be the narrowest measurement between the opening.

When calculating door prices use over guide width and guide height (if in between sizes use the price of the next door size up).

Motors may be fitted to the left or right. Please state which side when ordering (as viewed from the inside looking out (VILO)).

Width Measurement Guide

Height Measurement Guide

Note: A portion of the bottom rail will be visible below the top rail of the opening when the door is in the open position.

Box End Details

*Refers to the Roll-a-Glide Compact only

Guide Specification

Notes on colour: Door guides are available in colours matching the door curtain except laminate door colours (supplied in brown). Coloured guide rails are supplied as standard, however they may not match the lath colour. The manufacturing process for the lath profile results in a textured finish, whilst all other coloured items (guides, bottom laths, lock laths, optional fascias and vision panels) are supplied in a satin finish so cannot be guaranteed to match exactly. Over time, some scuffing may occur on front and rear surfaces of doors as a result of their normal operation.

Note: Full and half boxes are available to match painted coloured door curtains. Vandyke Brown boxes are supplied as standard for painted wood effect and laminated door curtains.

Fixing Options

IMPORTANT NOTES

- Doors with 70mm or 90mm guides are available with boxes. Doors with Half/Full boxes have 300/360mm aluminium/steel end plates.
- Doors with 270 & 300mm endplates have cylindrical barrels and spring loaded locking straps. Doors with 360mm endplates have a continuous carrier strip that attaches the door curtain to a 102mm hexagonal barrel.
- Powder Coating of box includes end plates.
- All powder coating prices are NET, not subject to discount.
- Actual RAL colours and finish may vary slightly from the door curtain colours.
- Guides/head plates/box/vision slats are available to colour match the door colour (except laminated finishes, which are supplied in Vandyke Brown). The inside face of all laminate doors is Vandyke Brown.
- Please note that guides/head plates and bottom lath may vary in colour to the door curtain.
- Some bottom rail will be visible below the top of the opening when door is in the open position.

Delivery

Price Includes delivery to Distributor premises on mainland UK. Delivery to site £40 per door.

Delivery day depends on location. These lead times are a guide only and can fluctuate during peak order periods, please seek confirmation.**

Ordering

PLEASE ORDER BY OVERGUIDE WIDTH AND GUIDE HEIGHT (on official order form). All Gliderol Roll-A-Glide doors are supplied with remote control operation with 2 handsets, a bottom rail safety edge, internal manual release and alarm buzzer as standard.

All Roll A Glide doors are ordered using the guide height (GH) and the over guide width (OGW). The OGW is the opening width plus 136mm (width of the guides = 2 x 68mm).

For technical specifications please see page 7.

FITTING BETWEEN THE OPENING

If fitting between the opening the over guide width of the door should be the narrowest measurement between the opening.

When calculating door prices use over guide width and guide height (if in between sizes use the price of the next door size up). Motors may be fitted to the left or right. Please state which side when ordering (as viewed from the inside looking out (VILO)).

IMPORTANT NOTES

- Doors are supplied with full box as standard and are supplied with 205mm aluminium head plates.
- Boxes/Guides/head plates are available to colour match the door colour (except laminated finishes, which are supplied in Vandyke Brown). The inside face of all laminate doors is Vandyke Brown.
- Powder Coating of box includes end plates.
- All powder coating prices are NET, not subject to discount.
- Actual RAL colours and finish may vary slightly from the door curtain colours.
- Please note that guides/head plates and bottom lath may vary in colour to the door curtain.
- Some bottom rail will be visible below the top of the opening when door is in the open position.

A Note Concerning Colours: Door guides are available in colours matching the door curtain except laminate door colours (supplied in brown). Coloured guide rails are supplied as standard, however they may not match the lath colour. The manufacturing process for the lath profile results in a textured finish, whilst all other coloured items (guides, bottom laths, lock laths, optional fascias and vision panels) are supplied in a satin finish so cannot be guaranteed to match exactly. Over time, some scuffing may occur on front and rear surfaces of doors as a result of their normal operation.

Ordering

ORDER BY OVERGUIDE WIDTH AND GUIDE HEIGHT (on official order form).

All Roll A Glide doors are ordered using the **guide height (GH)** and the **over guide width (OGW)**. The OGW is the opening width plus 140mm (width of the guides = 2 x 70mm).

For technical specifications please see page 7.

FITTING BETWEEN THE OPENING If fitting between the opening the over guide width of the door should be the narrowest measurement between the opening. When calculating door prices use over guide width and guide height (if in between sizes use the price of the next door size up).

IMPORTANT NOTES

- Doors are supplied with half box as standard and are supplied with 300mm aluminium head plates.
- Guides/head plates are available to colour match the door colour (except laminated finishes, which are supplied in Vandyke Brown). The inside face of all laminate doors is Vandyke Brown.
- Powder Coating of box includes end plates.
- All powder coating prices are NET, not subject to discount.
- Actual RAL colours and finish may vary slightly from the door curtain colours.
- Please note that guides/head plates and bottom lath may vary in colour to the door curtain.
- Some bottom rail will be visible below the top of the opening when door is in the open position.

**GLIDEROL
GARAGE DOORS**

Opening Doors Around the World®
www.gliderol.co.uk

Schedule of Manufacturer's Warranty Period

Gliderol Roller Doors - GlideRol A Door A & AA - Mini Roller Door - B Series Door - Roll A Glide - Roll A Glide Compact - Roll A Glide Manual 77

Gliderol Sectional Doors - Insul Glide - Safe T Glide

Gliderol Automation - Glidermatic RW1 Rol A Matic - IGDU Industrial - Glide A Tube - Glidermatic GTS 2000 - Glidermatic Optima

- Domestic/Residential use - 10 years corrosion free on door panel excludes paint surface rubbing or fading. (GlideRol A Door Mini Roller door has 3 year total warranty cover).
- 1 year on the lock and face plate, spring, bottom roller, weatherseal and polyglide, if fitted by an authorised Gliderol Distributor or Gliderol Technician. 3 month warranty on spring tension.
- Industrial/Commercial use - 1 year on the lock and face plate, spring, bottom roller, weatherseal and polyglide, if fitted by an authorised Gliderol Distributor or Gliderol Technician. 3 month warranty on spring tension.

The manufacturer strongly recommends that all Gliderol products be serviced by an authorised Gliderol Distributor or Gliderol Technician every 12 months to ensure longevity of the products' life. Failure to do this may result in any warranty being invalid.

Warranties of 1 year transmitter handsets (transmitters must be kept in normal conditions of humidity and temperature), 2 years electrical, 5 years tubular motors, 6 years mechanical and 10 years paint finish apply to all Gliderol doors (except Mini Roller Doors see above).

Garage doors should be inspected upon installation and viewed in natural daylight (not direct sunlight) from a standard distance of 3 metres to view their overall appearance. From this distance the door panel should appear free from visible marks or distortion, stains, blemishes, indentations or scuffs.

Only marks visible from a distance of more than 3 metres will be considered under warranty.

PRODUCT WARRANTY CONDITIONS

Warranty Conditions

1. Subject to the under mentioned specific limitations and exceptions, the Manufacturer warrants all new doors, motors and electronic components of its manufacture to be free from defect in workmanship under normal use and service and further warrants all installation carried out by the Manufacturer or by its nominated installers to be free from defects and workmanship its obligations hereunder being limited to making good any such defect PROVIDED THAT notice of any claimed defect in material workmanship in or resulting from installation of any door shall have been given to the Manufacturer within the period from date of installation as prescribed in the schedule hereto.
2. This warranty does not apply to any defect, loss or damage arising or caused directly or indirectly by or as a result of;
 - (i) Any masonry rendered or other surfaces cracking or collapsing during installation of the door.
 - (ii) Any defect or deterioration of timber including drying out after installation.
 - (iii) Any weakening or collapse of the structure to which the doors are affixed occurring any time after installation.
 - (iv) Any damage to or deterioration in the condition of the doors occurring in transit by customer nominated or appointed carrier or occurring after delivery and prior to installation.
 - (v) Any defect (including defects in component parts or accessories) rising from or attributable to the failure to carry out normal preventive maintenance or adjustment.
 - (vi) To any additional defect damage or deterioration arising from or attributable to the operation of the door after it is known to be defective.
 - (vii) Any door being installed within 800 metres of the sea or other body of water of equivalent or greater salt concentration or in an area subject to industrial fall out.
 - (viii) Any fault or surge in customer's electricity supply.
 - (ix) The door striking an immovable object during travel.
 - (x) Garage doors should be inspected upon delivery and viewed in natural light (not direct sunlight) from a standard distance of 3 metres to view their overall appearance. From this distance the door panel should appear free from marks or distortion, stains, blemishes, indentations or scuffs. If any marks are only visible within 3 metres they will not be considered under warranty.
 - (xi) Over time, some scuffing may occur on front and rear surfaces of roller doors as a result of their normal operation, this does not affect performance and is not covered under the terms of the guarantee.
 - (xii) The manufacturing of sectional door panels employs roll forming or pressing of the steel skin to create the ribbed or Georgian features. Inherent in this process is the introduction of stresses into the steel that

may be visible when viewed at oblique angles or in strong direction light. Such distortions in no way affect the strength or performance of the door and do not form part of the warranty cover. Our manufacturing processes minimise these effects but may not eliminate them entirely. The door is considered to meet Gliderol's quality standard if no significant surface distortion can be seen when viewing a closed door from a central position at a distance of 3 metres under even light conditions. Strong directional light such as bright sunshine or car headlights may reveal minor distortions at such distances but are not part of the warranty cover.

3. Items excluded from warranty;
 - (i) Batteries
 - (ii) Fuses
 - (iii) Globes
 - (iv) Sensitivity adjustments
 - (iv) Minor factory repairs
4. While Gliderol doors are long lasting and hard wearing under normal conditions this warranty does not extend to inherent defects in steel or other material used in the manufacture. The Manufacturer will however, procure and assign to the customer the benefit of the warranty of the manufacturer of the steel or other material.
5. If Manufacturer has at request of customer procured painting, powder-coating or other surface application to its product this warranty does not extend to such painting, powder-coating or other surface application. For this purpose Manufacturer at all times acts as agent of customer. Manufacturer may as a service to the customer but without any legal obligation to do so, assist customer to obtain redress in respect of any defect.
6. The Manufacturer reserves the right to touch up on site the paint finish and or pre-painted surfaces on its range of garage doors but no responsibility will be taken for the possibility of any paint rubs, scuffing etc on the internal wash coat finish or external painted surface.
7. Proof of purchase MUST be provided to the manufacturer at time of warranty claim. If proof is not available any warranty may be invalid.

CONDITIONS OF SALE AND INSTALLATION

(If installation carried out by Gliderol or an other installation company)

1. Manufacture of Gliderol Doors will not commence until accurate site measurements are available and can be checked.
2. Where Gliderol Doors are made to suit floor levels, lintel heights or opening sizes guaranteed by the customer, any departure from the given sizes will be the responsibility of the customer as will any costs involved in alteration of made-up Gliderol Doors.
3. Any delivery, and/or installation dates given are approximate only and the Manufacturer accepts no liability for delay from any cause whatsoever. If by any reason or Act of God, war, government or semi-government enactment, regulation or restriction, lock-out, strike, industrial dispute, fire, tempest, flood, failure or inability to obtain licenses, transport or materials or any other cause beyond the Manufacturer's control delivery or installation is delayed the Manufacturer may extend the time of delivery or installation or if the Manufacturer is unable to deliver or install, the contract shall be voidable at the Manufacturer's option with no right to either party for damage, loss, cost or expense.
4. If these conditions of sale (which shall only be varied, modified or rescinded by written agreement executed by the Manufacturer) shall differ in any respect from the customer's acceptance or confirmation then these conditions shall prevail.
5. Any claim for damaged product must be made within 7 days of installation or delivery.
6. The Manufacturer may carry out installation or may nominate an accredited Installer Contractor to carry out the work. Installation is then a matter of separate contract with the Installer whose particulars is either provided in this quotation or will be provided upon confirmation by the customer. The Manufacturer has taken all reasonable care to ensure that any Installer Contractor nominated is competent, experienced and skilled in the installation of the Manufacturer's doors. The Manufacturer will at all times use its influence to ensure any installation complaint is dealt with promptly and resolved to the reasonable satisfaction of the customer. The customer's attention is also directed to the terms of the warranty above. However the manufacturer is not responsible or liable for any installers or contractors standard of workmanship and or ability to install any product or possible service issues thereafter.
7. Installation by Gliderol or installer contractors covers only the installation if the door and not, unless specifically stated, and rectification of existing out-of-square openings or removal of old doors and fittings or electricity of gas fittings or the like. Installation by Gliderol does not include the removal or taking away of old doors from the property or of disposing of such doors.
8. Whilst reasonable care will be taken while drilling and fixing, the Manufacturer and its Installers will not be responsible for the failure, from any cause whatsoever, of any masonry or rendered surfaces while drilling or fixing by cracking or collapsing.
