MON - FRI - 8.30AM - 5.30PM

Welcome the Samson Industrial Roller Shutter Door Range

Roller shutter doors for the purpose of access into any building from just one operation a day up to constant use 24 hours a day. Made to measure sizes as standard with multi fix options and multi option electric drive and control options. Single skin basic steel construction and double skinned insulated curtain options in a range of standard colours with options on any RAL or BS colour.

- * All doors are fully compliant with latest UK safety requirements
- * All doors are made to order for the perfect installation and specification
- * Easy fit options with flexible installation components which can be adjusted on site
- * Highest quality components in the door construction, no plastic or inferior small components
- * Electric motor drive options with latest control panel design and easy programming

"Don't buy cheap and end up buying twice, get it right the first time with a Samson Door"

Reasons to Choose Samson

✓ A name you can trust

When buying a product from Samson you can be reassured by the values behind the name. Samson manufactures are CE marked and some also hold an ISO9001 and ISO14001 Certified Company.

✓ Expert advice

With a full-time technical team, field support and a helpline on hand you can be confident in choosing a product with first class backup and service.

✓ A solution for everyone

With so much choice from Samson, our vast range of products can accommodate most industrial door requirements, whether you need insulation, vision, or are looking for a solution for a specific budget.

✓ Engineered to perfection

In partnership with some of Europe's biggest manufacturers, whose continuous development and specialist engineering, products offer unrivalled quality and the most advanced specifications. High emphasis is placed on ease of fitting and flexibility on site.

The Simple All Rounder

A galvanised steel single skin door curtain construction in manual or electric operation options. This is the roller door for unheated buildings with multiple options on drive methods.

Specialised Industrial Roller Doors

Samson offer an even wider range of industrial and commercial roller shutter doors where the specifications are outside the "normal" requirements.

Teckentrup XXL Roller Shutter Door

Teckentrup XXL Roller Shutter Door

A roller door for single door construction up to 18 metres wide and with a central removable transom it can be up to 36 metres wide. Ideal for aircraft hangars, wide warehouse doors and similar. Options on the curtain construction and only available as an electric operation.

ThermoTeck Insulated Roller Door

ThermoTeck Insulated Roller Door

An insulated roller door with many variations in motor drive and insulation levels. Available in heights up to 12 metres high and a very secure and durable roller shutter door.

Hormann SB Roller Door

Hormann SB Roller Door

A spring balanced roller door like no other with a side tension spring system for easy installation and very easy manual emergency override. This is a door system available as a single or very stylish double skinned insulated door in manual or electric operation

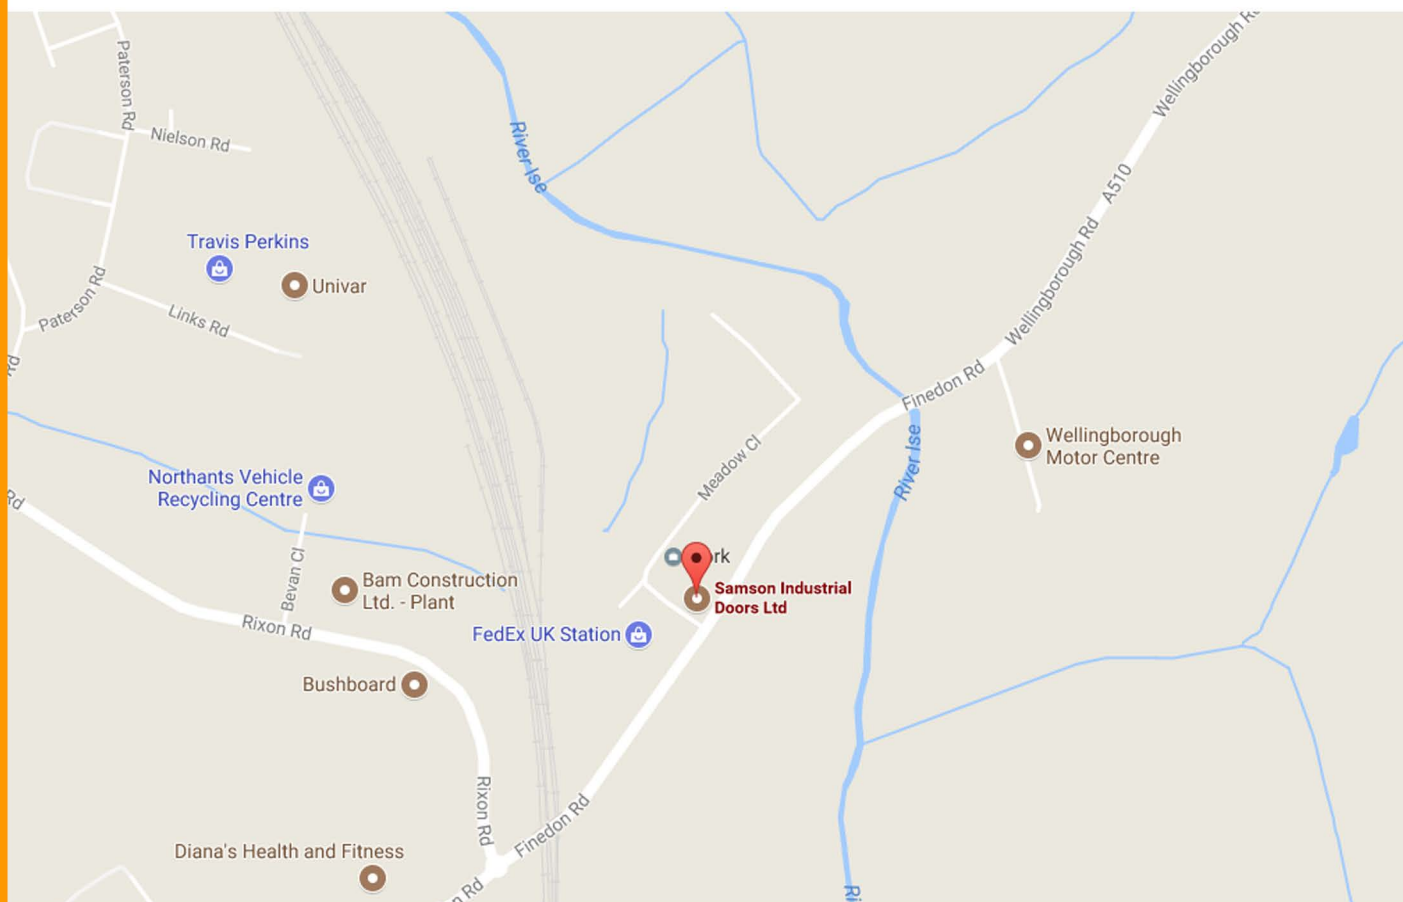

Hormann Spiral Door

Hormann Spiral Door – HS 7030PU

A new concept in roller doors, this is a high speed, non contact, insulated roller type door which has panels for curtain more like small sectional door panels. It is a very strong and very durable roller door for hi usage and can operate at up to 2.5m per second. Latest technology in motor drives and controls this is a 21st century door solution where high performance is a must of the building.
