Responsibility for generations

The Hörmann family business has over 85 years of experience as a construction component specialist. This gives us an obligation to both current and future generations. That's why environmental responsibility plays such an important role for us. With this in mind, we develop innovative solutions for sustainable products and intelligent environmental protection.

4 GOOD REASONS

"A GOOD REPUTATION MUST BE EARNED."

August Hörmann

In keeping with the tradition started by the company's founder, the Hörmann brand is a true promise of quality and is one of Europe's most successful suppliers in the area of entrance doors. Due to the comprehensive international sales and service network, Hörmann is your strong partner for high-quality construction components.

AN EYE ON THE FUTURE. Hörmann is setting a good example. That's why 100% of our electricity needs in Germany come from green electricity. Together with an intelligent and certified energy management system, CO_2 -neutral mailing and the recycling of valuable materials, more than 60000 tons of CO_2 are saved each year. In addition, we offset over 100000 tonnes of CO_2 by promoting wind energy and reforestation projects in cooperation with ClimatePartner.

Brand quality made in Germany

The family-owned company Hörmann offers all important construction components for building and renovating projects from a single source. We manufacture in highly specialised factories using state-of-the-art production technologies. Our employees work intensively on new products, continual further developments and improvements to details. The results are patents and unique products on the market.

LONG-LASTING. GUARANTEED. All major door components are developed and manufactured by Hörmann. Endurance tests under real conditions ensure mature series products with Hörmann quality. Thanks to this and uncompromising quality assurance, you receive a 5-year warranty on all Hörmann entrance doors Thermo65 / Thermo46.

CONVINCING IN EVERY VERSION. Our entrance doors are superior to plastic or timber doors in many ways. When it comes to thermal insulation, all of our entrance doors meet the requirements of the new German Buildings Energy Act (GEG). Our acoustic-rated doors also reduce street noise to room level and our fire-rated doors are the ideal choice for between the garage and your living space.

 \rightarrow For further information, see from page 30.

02/23

Door design for the highest demands

Greet your guests with a Hörmann entrance door! And of course, you and your family can also delight in the sophisticated design of our doors day after day. Our doors are a true eye-catcher on the outside, and inside they harmonise perfectly with your residential internal doors. Simply beautiful!

8 GOOD REASONS

DOOR LEAF WITHOUT VISIBLE LEAF PROFILE.

Thermo65 and Thermo46 doors make for an exquisite and elegant reception – whether you use them for your main or a side entrance. The stylish door leaf with its solid interior and exterior and leaf profile on the inside fulfils the highest design requirements. The interior view harmonises perfectly with your residential internal doors.

TOP. Exterior and interior view of Hörmann entrance doors without visible leaf profile

BOTTOM. Exterior and interior view of entrance doors from other manufacturers with visible leaf profile

PAGE 8. Steel / aluminium entrance door Thermo65 style 515, stainless steel handle HB 38-2, Matt deluxe Grey aluminium CH 9007, optional side elements

We protect you from unwanted visitors

An apartment is broken into every five minutes, making it even more important to equip your entrance door with a high security standard. If a burglar is not successful within approx. 90 seconds, they generally give up their break-in attempt. For this reason, nearly half of all break-in attempts fail if the entrance door is break-in-resistant.

BREAK-IN-RESISTANT LOCKING. For you and your family, being able to rest easy in your own home is important. This is why our Thermo65 / Thermo46 doors are equipped with multiple-point locking as standard. And with the standard soft lock latch, the doors also close very quietly.

RC 2 security

Tested and certified

FOR INCREASED SECURITY. With the optional RC 2 security features, our entrance doors make it especially difficult for burglars to break into your home. This protects your home from break-in attempts. Additionally, the certified security features are not visible on the door, unlike with many competitor solutions.

 \rightarrow For further information, see from page 30.

Entrance doors tailored to your specifications

Whether you want a new entrance door or a door for you side entrance: The Hörmann range is designed to meet your needs. We offer you doors tailored to your exact wishes. Whether with an elegant look, large glazings or intelligent operating comfort – anything is possible, exactly the way you want it. Be inspired by the Hörmann variety on the following pages or configure your dream door conveniently online.

THE DOOR OF YOUR CHOICE IN JUST A FEW

CLICKS. With the door configurator, you can conveniently test many design and product variations on your own PC or tablet in advance. You can put your dream entrance door together in just a few clicks by selecting the door version, style, colour and size and also see the recommended retail price of your configuration. If you then upload a picture of your house and place the door in your entrance, you can see in advance how well your new entrance door will match your home.

Thermo65

CUSTOM ENTRANCES. Create stylish, attractive entrances and fill your home with more light. Each door style shown can be combined with side elements and transom lights. Special door versions are also possible, such as doors opening outwards. At Hörmann, you are sure to find the entrance door to suit your home.

TOP. Steel / aluminium entrance door Thermo65 style 010, stainless steel handle HB 38-2, Decograin Golden Oak, optional side elements

LEFT. Steel / aluminium entrance door Thermo65 style 010, stainless steel handle HB 14-2, Anthracite grey RAL 7016, optional side elements, opening outwards

PERSONAL DESIGN. You can custom-equip each of the entrance door styles. You want a special external handle or glazing? We offer all the options you need to give your entrance door a personal touch. When choosing a colour for your new Hörmann entrance door, we let your creativity run wild. Your options include soft matt colours, elegant Matt deluxe colours or authentic, natural Decograin decors. The interior and exterior are generally the same colour. Optionally, you can order the Thermo65 in Traffic white RAL 9016 on the inside to match your white residential internal doors. **RADIO DOOR LOCK OPERATOR SMARTKEY.** Easily open your door lock at the press of a button with your hand transmitter, radio internal push button or directly via the sensor field on the SmartKey. No need to set down your groceries in order to open your entrance door. Even with a walker, wheelchair or pram, it is much easier to enter your house, because you can open the door from a distance. Locking takes place either by pressing a button or automatically after a specified period of time. This securely locks your door and provides protection against break-ins.

 \rightarrow For further information, see from page 40.

RC 2 security Tested and certified

Security doors

The opportunist burglar attempts to break open the locked door with simple tools within 3 minutes.

Acoustic-rated

Acoustic-rated doors

You can use certain Thermo65 styles as acoustic-rated doors. With the standard threshold the doors achieve acoustic rating category 3 (42 dB) and acoustic rating category 2 (37 dB) with the optional retractable bottom seal. They provide protection against street noise as well as wind and weather: the ideal door for entrances in blocks of flats with arcades.

Fire-rated doors

El₂30

Fire-rated door Thermo65 style FSTHP 010 withstands a fire for at least 30 minutes, making it the right solution for between the garage and your living space (e.g. entrance hall). It also offers good thermal insulation for this sensitive area.

Fire-retarding

10 Door drip

(not shown)

Attractive protection: The door drip in White aluminium RAL 9006 or in stainless steel diverts driving rain and can also be easily retrofitted.

11 Retractable bottom seal

(not shown)

This optional equipment is the best solution for sealing entrance doors without threshold rail used for barrierfree entrances.

Safe glazing.

When it comes to industrial safety and burglar protection, Hörmann entrance doors fulfil the absolute highest demands. The safety glass on the interior and exterior of the insulated glazing provides maximum security. In case of glass breakage, the glass splinters are also bound on the inside, virtually eliminating any danger of being injured by the shards. Furthermore, the laminated safety glass offers better burglar protection as it makes reaching through more difficult.

Automatic locks and electric extras

Smart security

Automatic lock with mechanical self-locking

(for Thermo65)

When the door falls shut, the bolts automatically extend and securely lock the entrance door.

Automatic lock with electric motor and opening via BiSecur radio (for Thermo65)

Open your entrance door easily and conveniently via a hand transmitter, code switch or finger-scan. There's no longer any danger of forgetting your keys. The lock automatically locks the door when the door is closed.

- Hand transmitter HSE 4 BS, textured surface black with plastic caps
- Radio code switch FCT 3-1 BS
- Radio finger-scan FFL 25 BS
- Finger-scan integrated in the door leaf

Automatic lock with electric motor and opening via Bluetooth (for Thermo65)

Opening your door via Bluetooth using your smartphone is even more convenient with the user-friendly Hörmann BlueSecur app. When closing the door, the lock automatically locks the door. You can optionally combine this equipment with an integrated finger-scan. **Electric strike** (for Thermo65 and Thermo46, not shown) With the electric strike catch, you can conveniently open your door via a switch inside the house.

Reed contact / latch switching contact (for Thermo65

and Thermo46, not shown)

For connection to the building services or alarm system and evaluation that the door is closed (reed contact) or locked (latch switching contact).

Radio door lock operator SmartKey

(for Thermo65 / Thermo46)

Easily open your door lock at the press of a button with your hand transmitter, radio internal push button or directly via the sensor field on the SmartKey. The automatic comfort lock ensures reliable and secure door locking. With the optional hand transmitter HS 5 BS or radio internal push button FIT 5, you can conveniently query whether the door is locked or unlocked – you no longer have to go to the door in the evening to check.

With the automatic lock with electric motor and BiSecur radio system, you can conveniently open your entrance door with a hand transmitter, radio code switch or radio finger-scan.

Another advantage is that you can use the same hand transmitter to operate your Hörmann garage door or entrance gate. The extremely secure radio system ensures that no unauthorised person can copy your radio signal. All operators, receivers and control elements with the BiSecur radio system are 100% compatible with each other.

Further information can be found in the door operators and Smart Home systems brochure.

Hand transmitter HSE 4 BS 4 button functions, incl. eyelet for key ring, textured surface Matt black with plastic caps

Radio code switch FCT 3 BS For 3 functions, with illuminated buttons, recessed and surface-mounted fitting possible, plastic housing in Light grey RAL 7040

Radio finger-scan FFL 25 BS For 2 functions and up to 25 fingerprints with hinged cover, recessed and surface-mounted fitting possible, plastic housing painted in White aluminium RAL 9006

Finger-scan integrated in the door leaf Fitting on the door leaf, for up to 150 fingerprints, VDS-approved, dimensions: 45×75 mm, optional for all automatic locks with electric motor

Bluetooth receiver For operation by smartphone using the Hörmann BlueSecur app

Radio door lock operator SmartKey Available in white or silver, incl. hand transmitter HSE 4 SK BS with labelled buttons

B Hörmann BlueSecur

Only from Hörmann European patent

Conveniently open and close your door via Bluetooth using your smartphone. Lock and unlock your entrance door using the userfriendly Hörmann BlueSecur app. In addition, other user permissions can be permanently or temporarily transferred to other smartphones, so that every family member always has their "entrance door opener" with them.
