

# SupraMatic garage door operator

The supra-fast operator with an array of additional functions.

As standard  
with black HS 5 BS  
and HSE 2 BS  
hand transmitters.

With the combination of speed and convenience, your garage door opens faster, allowing quicker access from the street into your garage. The SupraMatic has many added functions, such as being able to switch the lighting on and off with your hand transmitter and the convenient option of an additional opening height to ventilate your garage. An operator cover made of brushed aluminium also provides the SupraMatic with a very elegant appearance.

## Low power consumption costing only around £3 per year.

### Convenient inquiry of the door position // **NEW**

You can use the standard HS 5 BS hand transmitter at any time to check that your garage door is closed.

### Faster door opening

An up to 50 % faster opening speed gets you inside your garage sooner.

### Additional opening setting

With an adjustable opening option, you can ventilate your garage without completely opening the door.

### Halogen lighting can be switched on/off separately

The operator lighting can be switched on and off separately, via your hand transmitter or the IT 3b optional internal push-button unit. Optionally available as an LED reflector lamp.

### Easy-to-use programming // **NEW**

All of the operator functions can be set very easily by entering a two-digit number.

### High security

The standard EL 101 photocell for the SupraMatic P immediately detects persons and objects. Families with children especially appreciate this level of safety.

### SupraMatic E

Pull and push force: 650 N  
Peak force: 800 N
