

The weinor Terrazza patio roof

*Your patio roof –
a well-protected space in the open*

The weinor Terrazza patio roof extends the season by many weeks,
or can conjure up a *transparent Glasoase®* for you

www.weinor.com

Extended season for outdoor lovers

Now you can enjoy your patio from the very beginning of spring until well into the autumn

Eating, chatting, playing, reading – no matter what you want to do outdoors, the weinor **Terrazza** patio roof will protect you from the elements. Even a barbecue can continue when it rains. The season becomes much longer. Even valuable patio furniture can be left outside safely. The **Terrazza** not only gives you an area where you can feel comfortable, it extends your living space and consequently the value of your property.

Increased comfort with sophisticated parts

Would you like to spend more time in the fresh air? The clever **Terrazza** system can be extended to fulfil your dreams. The **Tempura** heating system provides a comfortable amount of

warmth, while the **Lux** light bar gives out a pleasant light. The various awnings can give you pleasant shade and protect you from prying eyes. All from one source.

Create a **Glasoase®** with glass side sections

The patio roof, combined with glass side sections, means you can have a well-protected space outdoors – from the sun's first rays in spring until well into the autumn. When the weather is good you can simply fold the glass sections away.

With a weinor **Terrazza**, what was once an unprotected area is transformed into your new favourite outdoor space. You are well protected from the next shower of rain, and combined with the right awnings, from the sun and prying eyes.

Shapes and functionality of the weinor Terrazza patio roof

With an overhanging roof to protect you from rain from the side

The **WeiTop Terrazza L-E** pent roof has an additional roof overhang to give your patio better protection from rain. With this option, you can add up to one metre of additional roof overhang. There are two basic roof profiles to choose between:

WeiTop Terrazza L provides the construction with safety (for depths up to 6 m). The graceful **Terrazza S** is suitable for depths up to 3 m.

weinor patio roofs – a wide range of shapes and colours

A choice of shapes and colours to make your new patio roof a perfect match for your house, garden and lifestyle ...

Choose the right **Terrazza** system from a wide range of roof shapes for your personalised solution. You can, of course, use the **Terrazza** for very different purposes: for example as a roof above the doorway or cellar steps, as a carport or bicycle shelter.

Pent roof –

offset eaves

Other bespoke shapes on request.

**Exclusively from weinor:
a massive choice of colours**

Choose from 47 standard frame colours, 8 scratch-resistant and robust trendy conservatory colours (5% surcharge) as well as another 200 special RAL colours

Choose from a range of different roof shapes

The right solution for every kind of building

A cover for the doorway, cellar steps and car

The **Terrazza** is worth its weight in gold when it protects doorways, stairways or even if used instead of a garage. An airy **Terrazza** Carport protects your car from the elements. If fitted with the **Tempura** heating system, you won't even have to scrape ice from the windows.

A wide choice of wonderful frame colours – choose one to your taste

weinor offers a wide choice of colours for your patio roof to suit your house and furnishings. Combine them to your taste, and make your house a colourful place. The high grade powder coating provides the very highest aesthetic looks, while at the same time being particularly hard-wearing.

The 8 trendy conservatory colours (see above) with high quality metallic looks have a scratch-resistant and robust surface and are particularly suitable for patio roofs.

weinor glass sections at the sides

Flooded with light and award-winning

The Terrazza Glasoase® from the weinor world of terraces was awarded with the red dot award 2009 for exceptional quality of design. Rely on the security of an awarded quality product. ►

reddot design award
winner 2009

Fabric sight and sun protection at the sides

With the prize-winning **VertiTex** (red dot design award 2008) you can enjoy your patio in peace. The vertical awning protects you from unpleasant winds and prying eyes.

reddot design award
winner 2008

The weinor Glasoase® – wonderfully adaptable

Glass sections at the side make the Terrazza into an all-rounder – allowing you to stay outside in the wind and rain!

We call the **Terrazza** patio roof combined with glass sections at the side the weinor **Glasoase®**. The glass sections provide protection from rain, wind and the cold. When the weather is good you can simply fold the glass sections away and enjoy the air and the sun. You benefit: the durable construction of patio roof, glass side sections and shades all come from one and the same place – for uncomplicated installation and easy retrofitting.

Made-to-measure for wonderful views

Cross-sectional views (l to r):

- Window w50-c
- Parallel tilt and slide door w50-c
- Folding partition w40-c
- Fully glazed sliding door w26-c

Flowing transition to nature

with side glass sections you can make disappear

A choice of glass side sections to match your personal requirements

*Fixed glazing/
window/door
(w50-c)*

Side glazing – matched perfectly
Glass doors and windows of your choice, or fixed glass sections – it can all be fitted easily because the sections are all matched to each other.

*Parallel tilt and
slide door
(w50-c)*

If there is not much space: they can be tilted
The space saving tilt and slide doors can be moved to the side easily and comfortably from the tilting position. When open, you have a clear view of the garden, when tilted they provide good ventilation.

*Folding
partition
(w40-c)*

For opening large areas
Folding partitions are ideal when you need a wide opening. They can be slid completely away and open a whole side of your patio. Using the concertina principle you can make complete glass walls disappear in the twinkling of an eye.

*Fully glazed
sliding door
(w26-c)*

Frameless opening all around
The fully glazed sliding door offers a panorama in wide-screen format. When closed you have a clear view that is not interrupted by a section, because you just have a line of glass panes. But it gets even better: it is the only door system where the fully glazed doors are first pushed up to the wall and then turned inwards. In good weather you feel as if you are outdoors!

weiner Terrazza patio roof accessories

Stay outside longer with light and heat

Light creates an atmosphere

Extend your stay on the patio well into the night. The **Lux Design** light bar provides atmospheric light and is fitted directly under the sections.

Pleasant warmth well into the evening

With the **Tempura** heating system you can enjoy comfortable temperatures, even when it's getting colder outside.

All these components can be conveniently controlled with the **WeiTronic** remote control:

Tempura heating system

All shades

Lux light bar

Sliding roof window

Roof ventilator

All from a single supplier – versatile functions combined perfectly

Maximum comfort – from shades to lighting and pre-programmed remote control ...

If you want to relax in your favourite chair under the patio roof, you need comfort. Intelligent accessories by weiner provide pleasant shade, atmospheric lighting and comfortable warmth.

The pre-programmed **WeiTronic Remoto** remote control allows you to operate your equipment conveniently from your lounge. As all the components come from one place, they fit together harmoniously.

To match the design: wonderful fabrics

Combine the wide range of frame colours with over 140 exquisite fabric patterns from weinor's "moments" fabric collection. You could, for example, use the same colour as the house façade for the awning and its fabric.

With the right awnings

magnificently cool shade under your patio roof

Sure sun protection for every kind of patio

External shades

If the air cannot circulate adequately on your patio, we recommend that you fit an external awning from the **WGM** range. It is ideal for keeping the heat out and ensures comfortable temperatures under your patio roof.

Internal shades

Fitted underneath your patio roof, the weinor awning **Sothezza** provides pleasant shade for every recreational activity on your patio. Its design fits your patio roof perfectly.

Shades to provide privacy and protection from glare

The **Paravento** side screen or the **Aruba** are two weinor shades which will protect you from the sun's rays and prying eyes. From weinor, everything comes from one place which means the shape, colour and function of both awnings match your Terrazza system exactly.

Please see also our separate shade brochure!

weinor acrylic fabrics, with their high quality workmanship and tear-resistance, are noted for their exceptionally long lives. Special finishing processes also make them particularly UV resistant. Thanks to the latest nanotechnology, weinor's fabrics have exceptional dirt- and water resistant properties.

Automatic operation, depending on the weather

There is a wide range of **WeiTronic** weather sensors for motor-driven awnings: just a sun sensor, a sun and wind sensor or a sun, wind and rain sensor.

Depending on the version, they automatically open the awning in the sun and retract it in the wind and rain. That way they provide protection and safety, even when you are not at home.

We are committed to the very highest quality

weinor puts a very heavy emphasis on quality. From the design and sourcing of materials you can be sure of the best quality components and highest grade workmanship. This should result in many years enjoyment from your weinor **Terrazza**.

Top quality – the highest demands

weinor technology and service give you more

Sturdy design

The sophisticated design of weinor patio roofs provides maximum safety and longevity. A renowned engineering firm* has put the statics through their paces. Particular attention was paid to the stresses caused by the weather, such as loads placed on them by wind and snow. All components are produced industrially as series products. That way a patio roof from weinor provides the safety of a standardised quality product.

*Grobeck GmbH, Cologne 2005

“Made in Germany” quality

Our own powder coating

Since weinor is the only manufacturer to offer all the components from one place, all components are given the same powder coating. This ensures maximum colour accuracy and an identical level of shine.

Longevity

We don't cut corners on the big or small parts: All our small parts such as screws, nuts and bolts are of stainless steel so they will last especially long. All other parts are powder coated in an elaborate process. This makes them impact and scratch resistant.

Good advice from the experts

Installation of a patio roof requires competent partners with an open ear for your needs. Your weinor dealer will be happy to answer all your questions! weinor patio roofs are built to meet your needs exactly.

Perfect planning using state of the art technology

By using our **WeiCad** bespoke design software tool, we can visualise how the product will look when fully installed. This makes it much easier for all your questions to be answered, and also for your decision to be made.

Important Informations:

For textile sun protection: Creases can form in the fabric and when folding the awning cloth. That can lead to the areas of the fold appearing darker when seen against the light, particularly with light colours. Folds in the fabric in the areas of the seam, border and panels can be caused by multiple layers of fabric and different diameters of rolled up fabric. The stresses in the fabric caused by this can lead to rippling (e.g. waffle or fish-bone shapes). This is normal to differing degrees with nearly all awning fabrics. Creases and folds in the fabric do not reduce the awning's value or its suitability for its purpose. Awnings and conservatory blinds are for

protection from the sun and should be rolled up in rain and strong winds. Wet fabric creases more easily and as far as possible should only be retracted after drying out (please take care in strong winds and avoid the formation of puddles). Depending on the colour of the ordered frame we supply all small parts as well as crank handles and drives for units with crank mechanisms in black (similar to RAL 9005), white (similar to RAL 9016) or grey (similar to weinor 7319).

For patio roof, Glasoase®, conservatory: Let a qualified conservatory builder explain the causes of condensation and how it can be avoided at the planning stage.
