extra business

extra space ?

*Winsol Patiola allows you to ignore the uncertain factor of changeable weather.
You create extra space that is permanently available for use at any time of day
in any season.*

OUTSIDE YET STILL INDOORS

The first sun of spring, springtime barbeques, a stiff northerly wind showers or high summer sun, Patiola makes it pleasant for your customers at any time.

Winsol Patiola expands your restaurant, café, tearoom or other business by several substantial, extra profitable square metres.

extra comfort ?

Winsol Patiola thinks of your own comfort as much as your customers' comfort. The Patiola brings the mediterian atmosphere into your area, filtered light and shelter from wind and rain are allied to superb user-friendliness: a simple assembly of the head box and guides which are connected to a specific base plate, special designed guttering unit, perfectly tensioned water-proof fabric, flush or surface mounted switches or remote controlled transmitter.

In short Winsol Patiola provides you with all the comfort and user-friendliness you could dream of!

STYLISH LIGHTING

When the sun goes down, just flip on the light and immediately your Winsol Patiola magically turns the patio into a cheerful spot bathed in atmospheric, attractive light.

The Patiola can be equipped with one or more spotlight ducts. A spotlight duct for a standard 5 metre wide Patiola module contains six recessed spotlights. For ease of installation only one 220V power supply cable is required, even where several spotlight ducts are fitted.

For every 3 lighting points in a spotlight duct there is one specially designed, integrated transformer. For even greater convenience the Patiola and the lighting are both controlled from one and the same remote controller.

extra space, extra business

extra protection ?

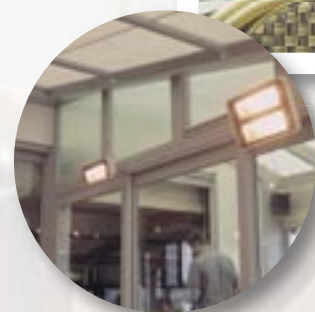

In summer your Patiola provides an airy, alfresco ambiance.

In winter, with heating and sidewalls, the Winsol Patiola gives that unique garden party feeling and your business becomes even more attractive.

FOR ALL SEASONS

Whenever the wind or rain starts to be a problem you can simply close one or more sidewalls for optimum protection.

With the sidewalls fully closed and possibly optional heating your customers can also enjoy the comfort of a pure patio atmosphere even in winter.

extra solution ?

Not only does your Winsol Patiola provide a convenient solution to all weather conditions, it also helps you comply with legislation, for example the smoking ban rules. We are all aware that these regulations are becoming stricter and will inevitably result in a total indoor smoking ban.

However, these restrictions do not apply out of doors and with a Winsol Patiola you can offer your smoking clientele an elegant solution without disturbing the non-smokers.

TECHNICAL SPECIFICATIONS

- The modules extend to a maximum of 6 metres.
For greater spans they can be placed back to back.
- Each module is 5 metres maximum in width.
Any desired width can be obtained by placing the modules side by side.
- For maximum flexibility each module can be operated and controlled individually.
- Guttering between fabric and frame ensures that rainwater runs off efficiently to the various downpipes keeping the interior as well as dry.
- You can choose from numerous colour combinations of specially treated, water-proof fabrics.
- White, brown or ivory powder-coated frames are standard, but you can also choose from other colours in the RAL colour range.
- Discrete and inconspicuous remote control is optional.
