

Carport with a flat roof

In a volatile climate you will be happy to keep your car, caravan, boat or other property protected from freezing rain, snow, rain and bright sunshine. An aluminium carport with a flat roof provides the right protection and extra comfort.

Comfort

A carport with flat roof also provides the necessary comfort. For example, bird droppings on your washed car are a thing of the past, your car stays cool in the summer and you do not have to be in the rain when you are getting in or out of your car.

Convert to veranda or shed

With just a few adjustments it is possible to turn this canopy into a veranda, shed or a combination of these two.

The carports of Gardendreams are made of high quality aluminium and are easy to place, without having to make adjustments to your property. The canopy with a flat roof is easy to assemble and fits almost any type of home.
