

## SeceuroGuard 1000 and 1001 Retractable Security Grilles Ordering Dimensions

All Samson Products are ordered by Width first and Height second in any references used.

### Ordering Dimensions

Please make sure you allow any tolerance from your dimensions to allow for installation into the reveal. We recommend 5mm all round as a minimum depending on how accurate your measuring is and how square the aperture is.

If you are installing to the face of any part of the opening, please be sure you have added the right amount on for ordering.

Additional profile sections are available to assist with face fit installation.
