Product Brochure

Trellidor UK is part of the Trellidor Group, an international leader in the design, manufacture, and installation of security barriers. We create and install custom made security grilles, lock down shutters, and louvre shutters, combining world class security barriers with world class service.

Trellidor products are certified to UK and European standards and we continue to develop and innovate to meet customer requirements and new threats that arise in the market. Our products have stood the test of time and have proven to be successful in doing the job they were designed to do.

Decades of testing and development have ensured that Trellidor products are the security barriers of choice worldwide for high-risk applications in the retail world, sensitive government installations, rail networks and embassies.

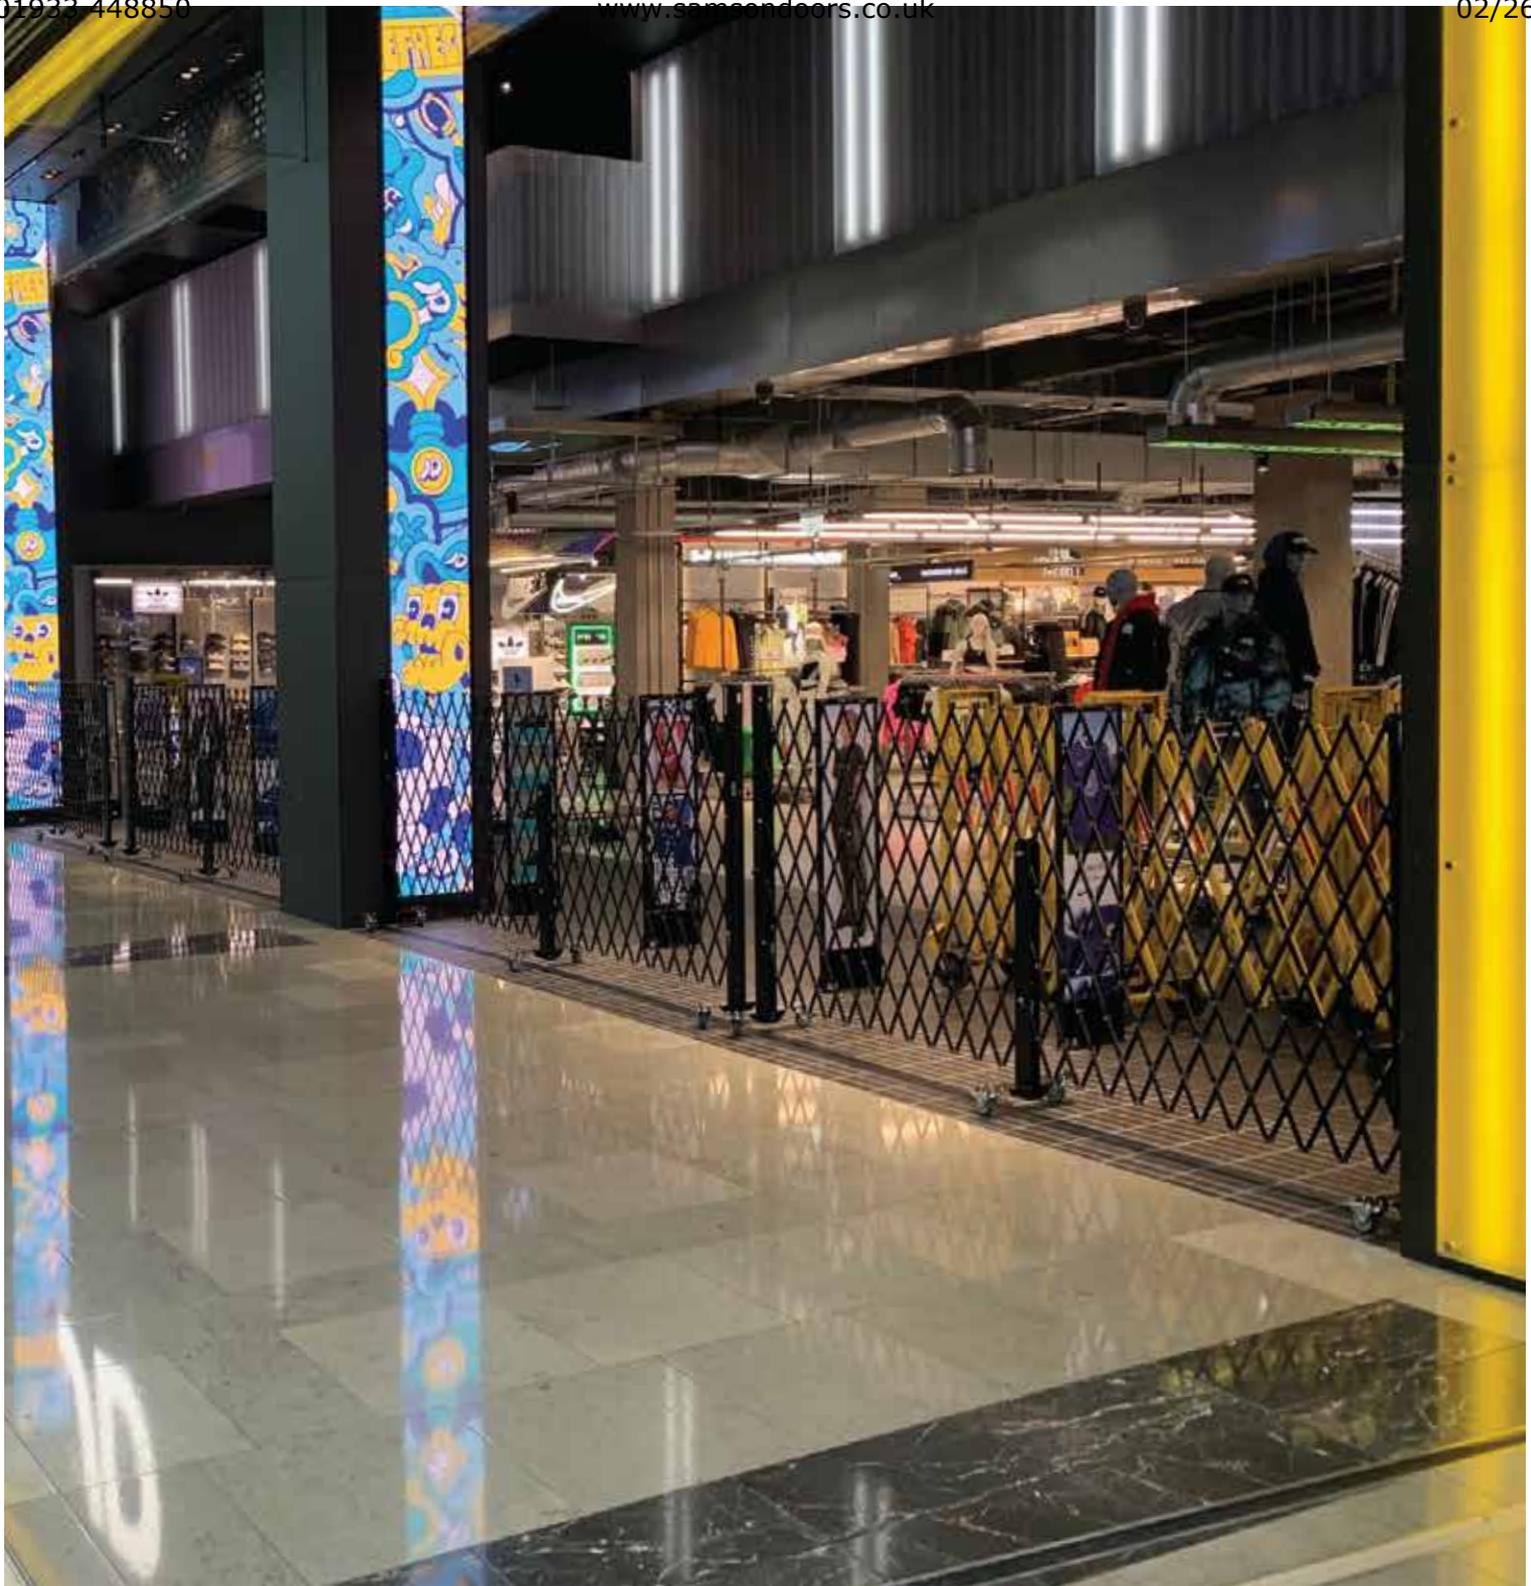

We personally take ownership of the design and manufacture our products and in providing customer service excellence. Our team installs security barriers nationwide to guarantee the perfect solution and peace of mind, often performing this work at night to minimise the impact on our customers' trading activity.

Trellidor UK is committed to creating partnerships with customers. We listen to customer requirements, respond with a customised solution, react proactively to attempted security breaches, and use survey data to constantly innovate and develop.

This approach led to our company being nominated by a major UK retailer as its 'Vendor of the Year' at the Annual Risk Awards 2021.

Trellidor UK is a member of Secured by Design (SBD), the official police security initiative that works to improve the security of buildings and their immediate surroundings to provide safe places to live, work, shop and visit.

MOBILE ACCESS BARRIER

Trellidor Access Guard is a mobile, expandable, trellis-style barrier that requires no fixed installation. It can be moved quickly and easily from one location to another. Because it is expandable it can be adjusted to perfectly fit apertures of varying sizes. For larger spaces, several Access Guard units can be attached and locked to create a secure barrier of extended length.

TRELLIDOR T700

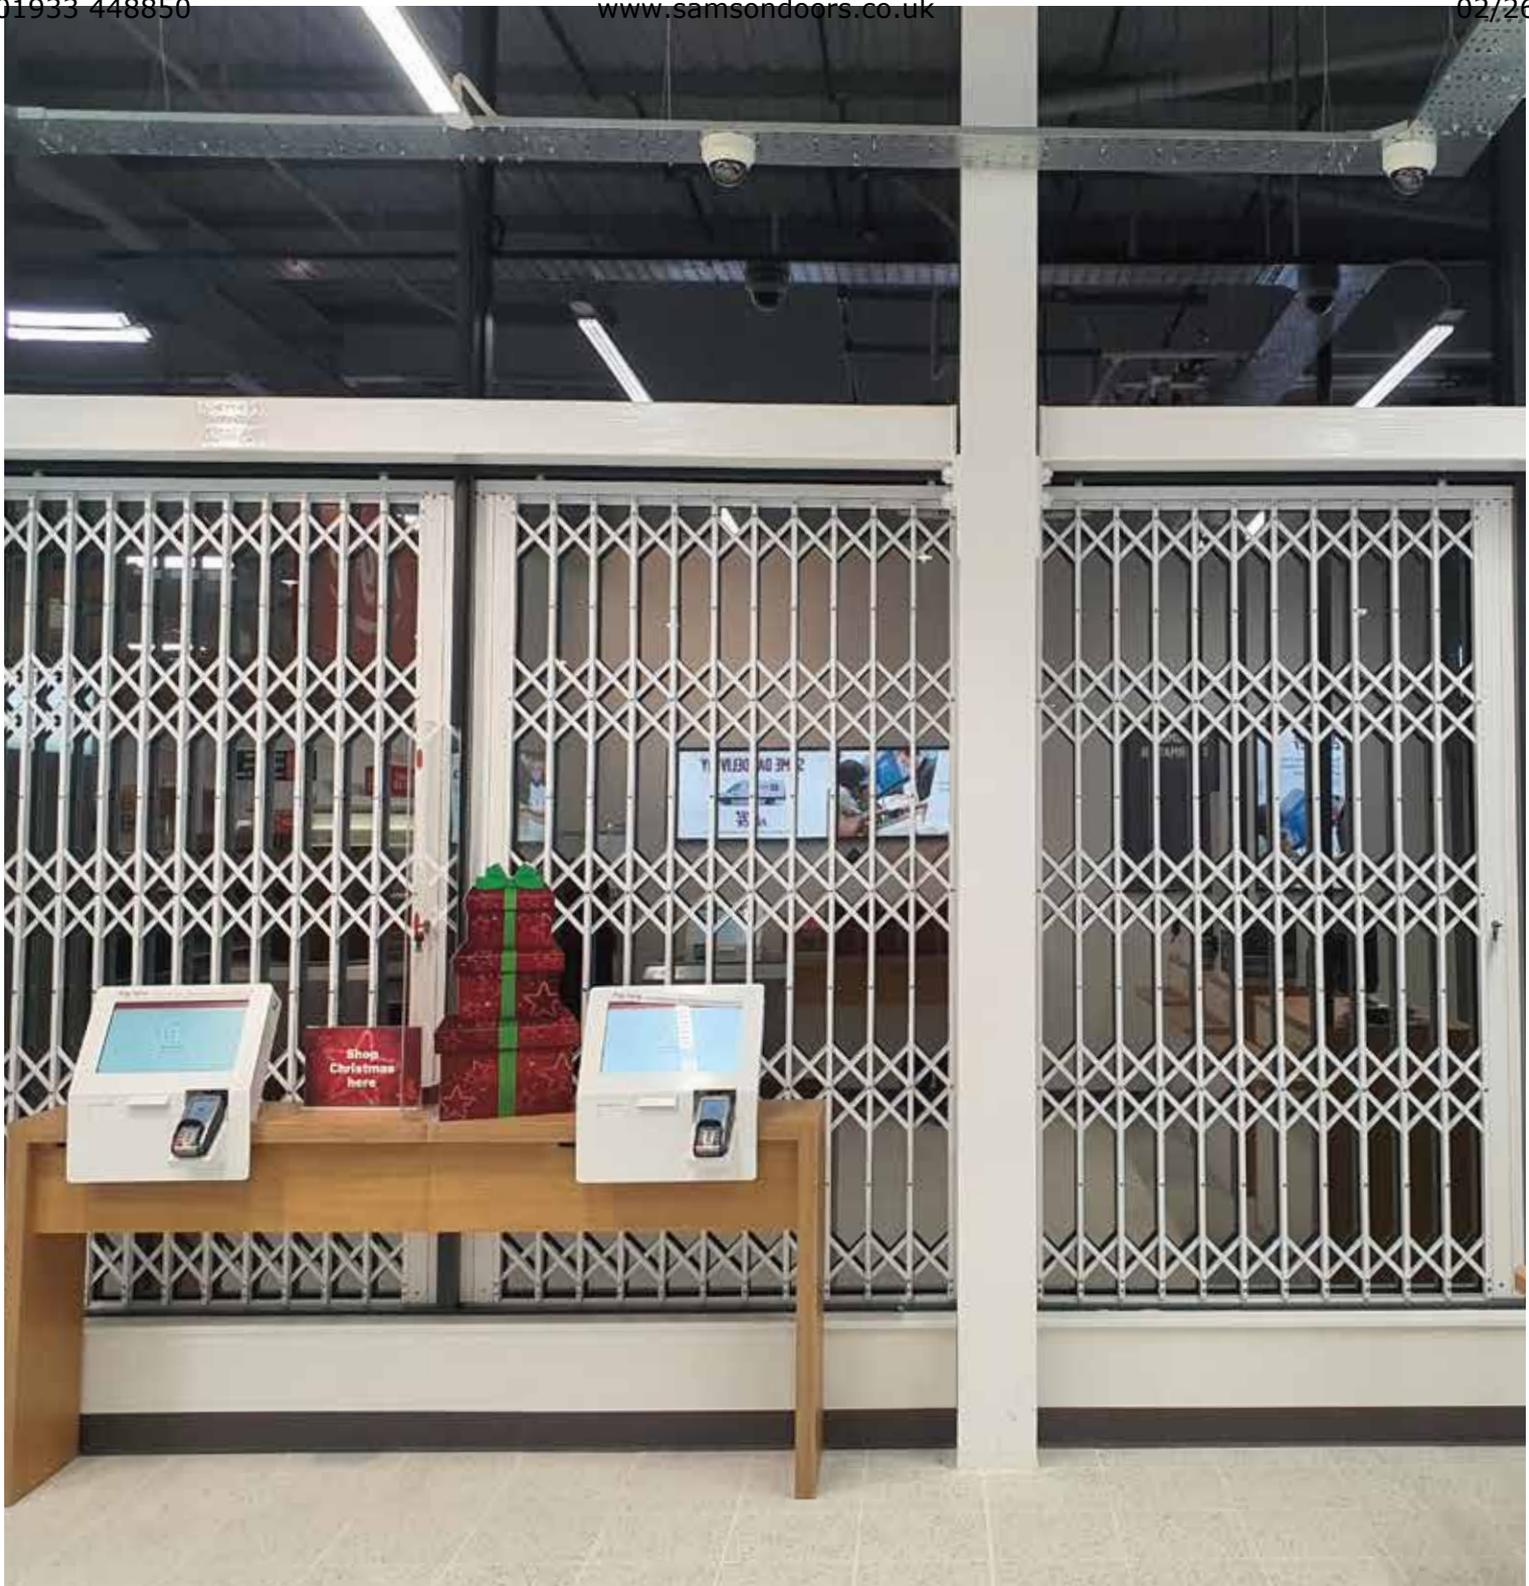

The Trellidor T700 Retractable is a fully framed, galvanised steel grille, available in a retractable or fixed configuration. It is custom-made for doors, windows, stairways, and retail outlet openings. It has been used to secure households and commercial premises around the world for over 45 years. Our design is neat, compact and operates smoothly. It is fitted with a patented Trellidor locking system that locks in multiple places inside the lock stile using a single key and lock.

TRELLIDOR[®]
THE ULTIMATE CRIME BARRIER

TRELLIDOR PLUS - T900

The Trellidor Plus - T900 collapsible security grille has been certified to BRE Standard LPS 1175: Issue 6. It achieved an LPCB Level 1 security rating after comprehensive testing for intruder-resistant barriers. Models include single, double, flexi and side-by-side collapsible doors and fixed units. Retractable doors are fitted with a patented Trellidor deadlock that locks in multiple places inside the lock stile using a single key and lock.

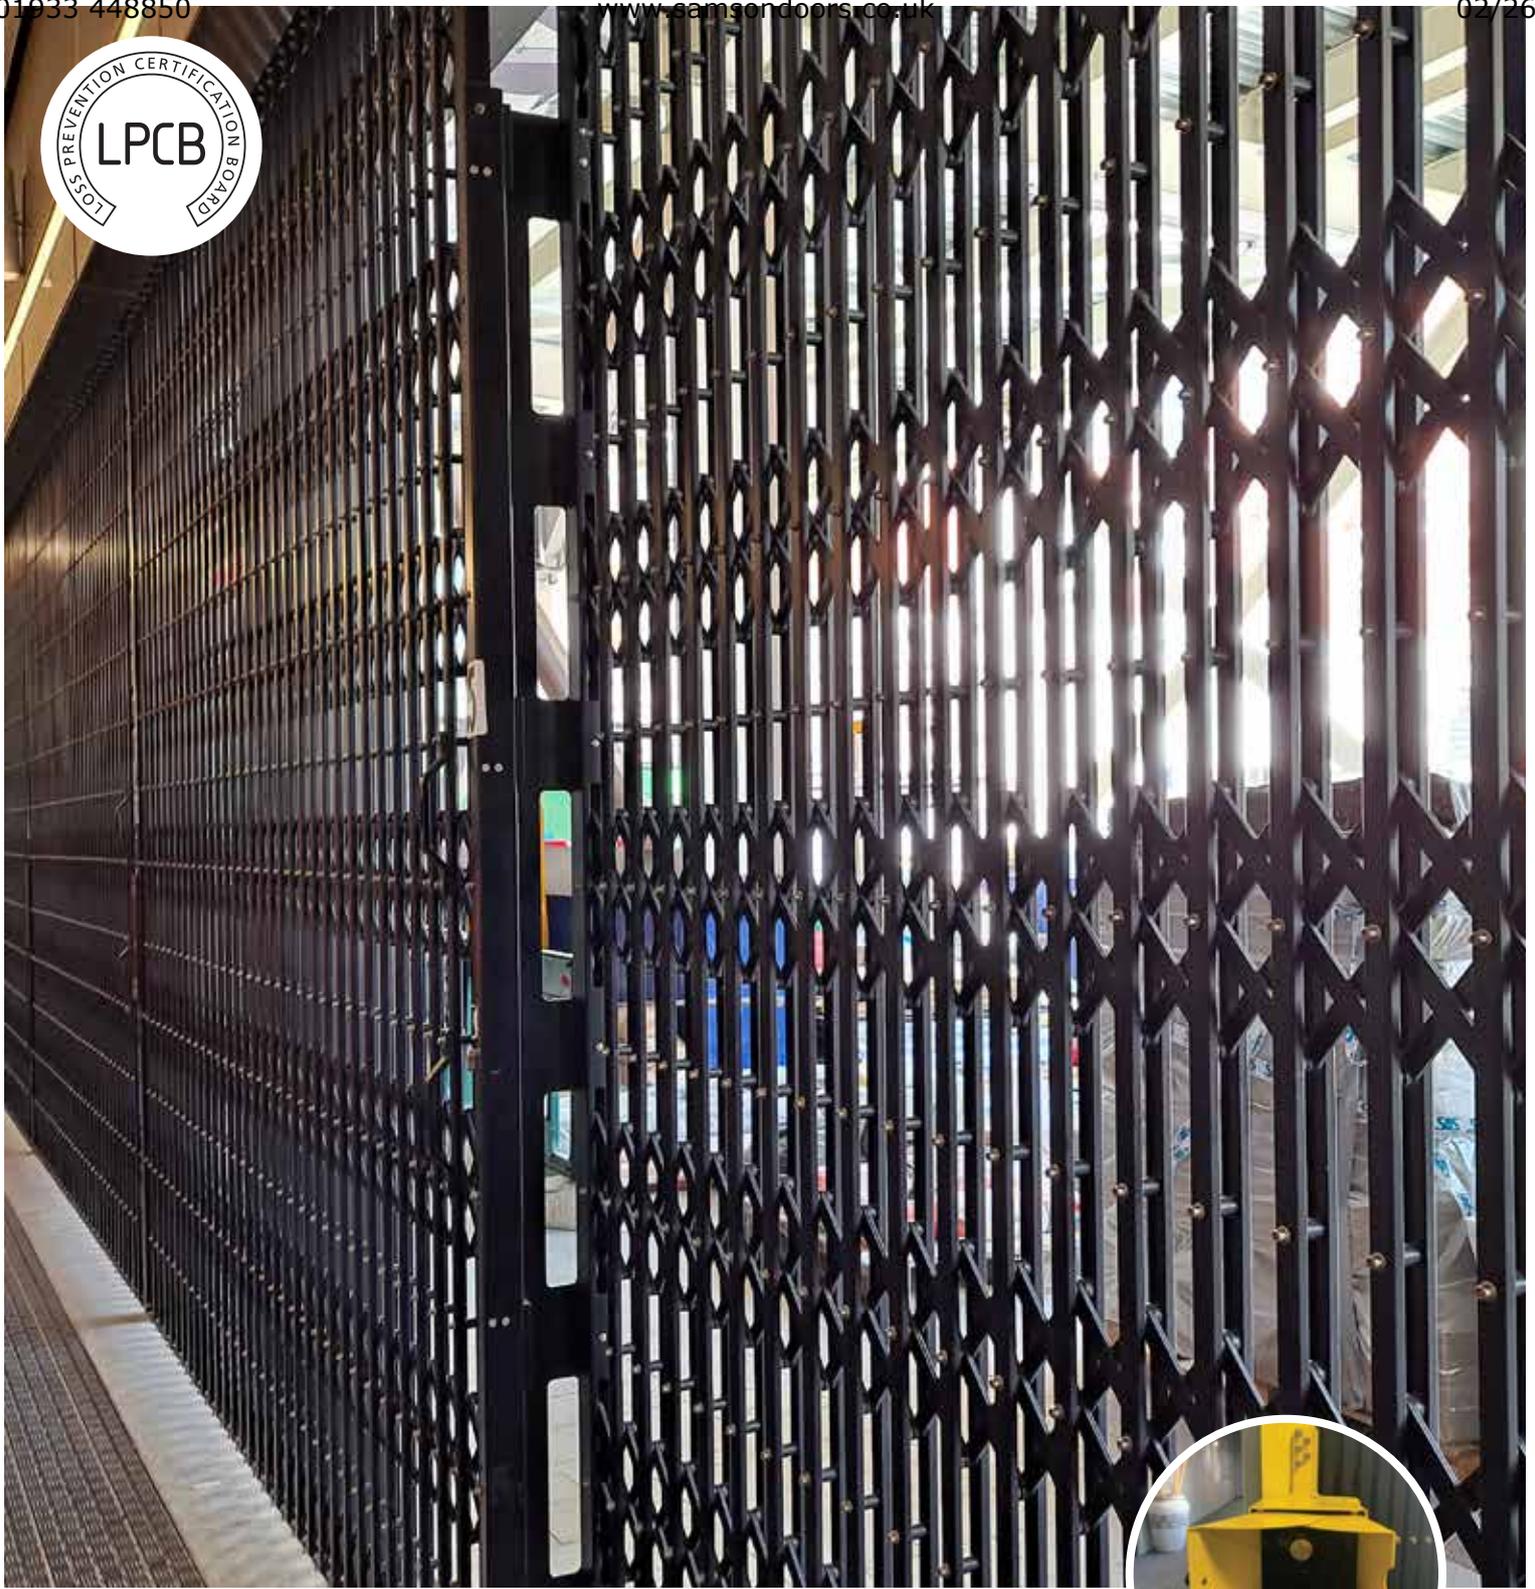

TRELLIDOR T950I

The Trellidor T950i security grille has been designed to protect higher risk applications such as commercial and retail properties. It is fully framed and available in single, double, and flexi retractable doors and fixed units. This product is manufactured from a combination of galvanised mild steel and extruded aluminium. It is strong and resilient, with built-in shrouds to protect the locking points; additional sets of flights across the uprights; an extended top track cover; and multiple locking points operated by the single turn of a key. It is top hung, so glides effortlessly when opened or closed.

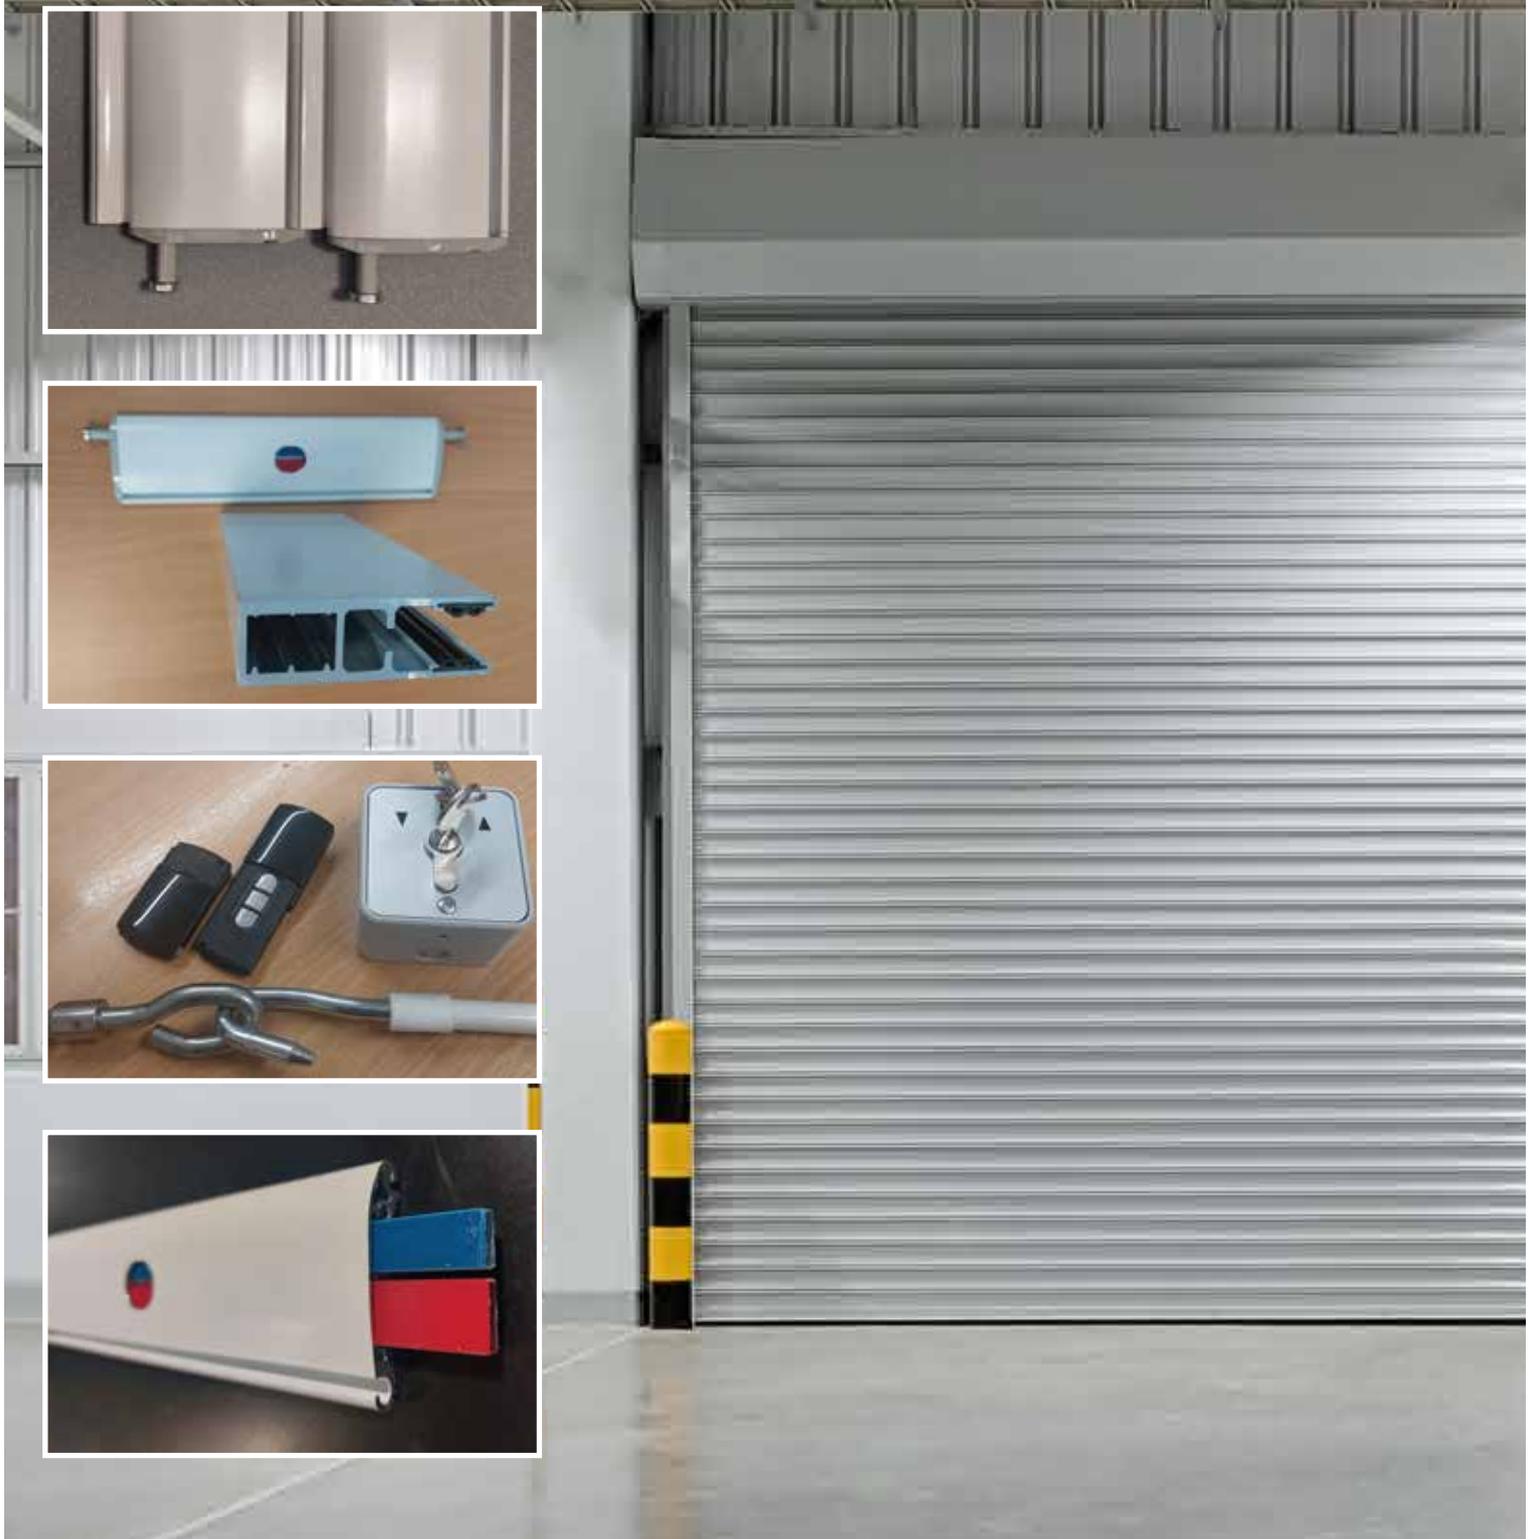

TRELLIDOR TROJAN II - T1000

The Trellidor Trojan II – T1000 has been certified to BRE Standard LPS 1175: Issue 5. It achieved an LPCB Level 2 security rating for single, double, flexi and side-by-side collapsible formats, fixed designs and an Emergency Escape locking option. The patented deadlock locks in multiple places using a single key. This collapsible security grille has additional strengthening features including a lock cover with cylinder shroud and a steel lock stile cover plate. It is certified to 3000mm in height.

TRELLIDOR TROJAN III - EMESC T3000

The Trellidor Trojan III - EMESC T3000 has been certified to BRE Standard LPS 1175: Issue 7 SR3, the highest certification received by a sliding security grille in the world. This design is certified to a height of 3630mm with unlimited width using multi sash and dual channel technology. It has an emergency escape locking system designed for quick release, keyless opening in critical situations. Configurations include single door, double door, side-by-side, and flexi sash options.

TRELLIDOR LOCKDOWN SHUTTER

The Trellidor Rollerstyle Lockdown Shutter is an RH65 double walled aluminium roller shutter door with outstanding strength. It incorporates non-mechanical, grind resistance technology with custom-designed slats and end retention laths that fit into the guide channels to work together and keep it locked down, even under severe lifting pressure. The shutter is automated and remote controlled but can be operated using a manual override crank. Battery back-up is offered as an optional extra should this facility be required.

TRELLIDOR PLANTATION SECURITY SHUTTER S1

The Trellidor Plantation Security Shutter S1 is an extremely strong, fully framed louvre security shutter. It looks similar to the sleek, clutter-free. The louvres have internal reinforcing and a patented Trellidor locking system, accessible from both sides. Locked shutters offer robust protection even with louvres tilted open for air flow and light penetration. It differs from the Premium Shutter in that it has additional strengthening features including lock-plates and a higher gauge material. It is at an advanced stage of testing for LPCB Level 1 certification, with confirmation pending

early in 2022

TRELLIDOR PLANTATION SECURITY SHUTTER

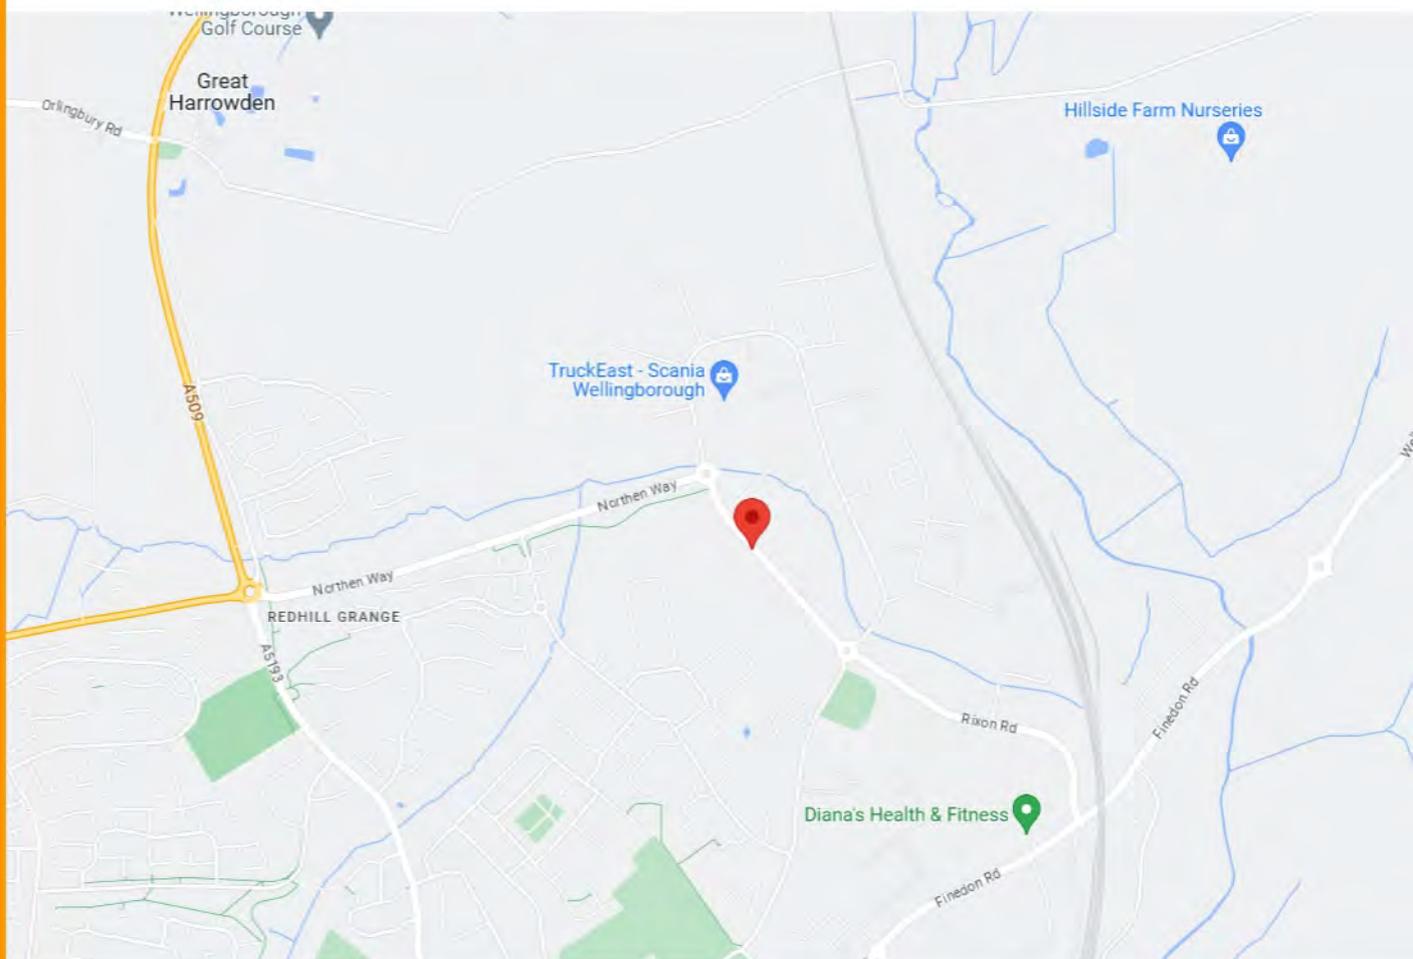

The Trellidor Plantation Security Shutter is a high quality, streamlined aluminium louvre shutter at an attractive price point. It has in-built strengthening features such as a dependable Trellidor locking system that can be locked or unlocked from both sides of the shutter. Hand tilted louvres control privacy, light penetration, and air flow. Colour coded hardware, uniform frames across configurations and a variety of bottom tracks make this a versatile window and door solution.
